●○○ Easy

## Ferrero Rocher Golden Hearts

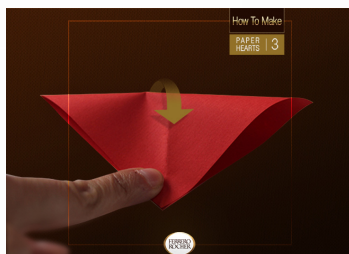

There are infinite ways to design your Valentine's Day table with these DIY origami hearts.

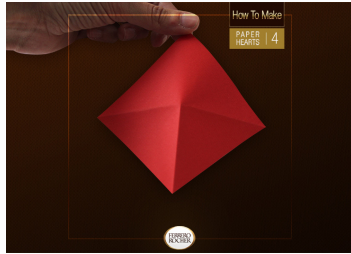

Cut squares out of a sheet of red construction paper.

Fold the squares in half by matching two opposite corners.

Then unfold the square and fold it matching the other two opposite corners.

The square should now have creases running from each opposite corner.

Fold one side of the square into a triangle again and turn the paper so it's "pointing" toward you.

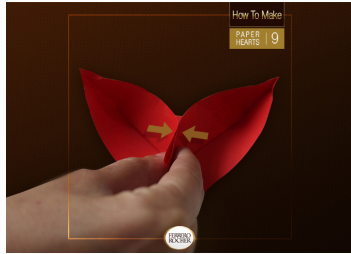

Place one finger between the fold on the left point of the triangle and press down. Then, fold the middle point on itself. This should produce a small cup on the left side.

Fold the paper back into a triangle and repeat Step 6 on the other side.

Fold over the left and right-side tips.

Pinch the sides of the top fold of the middle point onto itself.

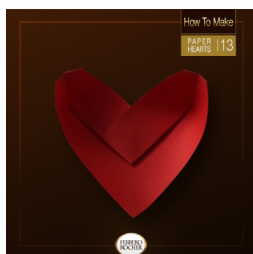

Next, fold over the top fold of the right side.

Fold the tip of the middle point inside.

Fold over the tips of the left and right sides.

You should now have a heart-shaped cup.

Place a Ferrero Rocher in each heart-shaped cup.
