

Golden Stars with a Ferrero Rocher®

Whether it's Christmas or New Year's, these elegant DIY stars will light up your dinner table. Here is a step-by-step tutorial:

1. For each star, you will need one white and one gold sheet of paper.

2. Draw a five-point star with lines from each inner and outer point intersecting at the center.

3. Cut out the star and fold along the lines. The folds from the lines of the outer points of the star should be raised.

4. Repeat the same process with the gold sheet of paper.

5. Add the white star to the top of the gold star with food-safe glue. Add a wrapped Ferrero Rocher® fine hazelnut chocolate to the top of the white star with food-safe glue.
